ABOUT

I'm a web developer with a knack for innovation and a solid foundation in JavaScript, HTML5/CSS, Node.js, React.js, SQL/NoSQL, RESTful APIs, Git/GitHub, TypeScript, and Firebase. Self-driven and diligent, I thrive in collaborative environments where creative thinking and effective communication lead to standout results. My sociable nature and unique perspective help me tackle problems from different angles, consistently delivering creative solutions.

SKILLS

JavaScript	Typescript	React.js
HTML5/CSS	Node.js(express.js)	Restful APIs
Firebase	SQL/noSQL(MongoDB,SQL)	Git/Github

PROJECTS

SoundScape Central+ HackerU Collage

Full Stack Developer Student

- Developed a music player application for my final project using the MERN stack and Firebase, incorporating libraries for state management, data modeling, and UI components, demonstrating my self-taught full stack development skills.
- Github repository: [Link](#)
